Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/519,107	Applicant(s) SUZURI ET AL.	
	Examiner Michael E. Nelson	Art Unit 1709	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Examiner notes that claims 17-24 should more accurately be dependent from claim 16, rather than claim 1, and should be corrected.

The species are as follows:

Group 1.

Group 2.

Group 3.

Art Unit: 1709

Group 4.

Group 5.

Group 6.

Group 7.

Group 8.

Art Unit: 1709

Group 9.

Group 10.

Applicant is required to select one of group 1-10 for examination.

As a second election with respect to groups 1-4, a further selection of one of groups 11-18 (shown below) is required, to be examined in the context where the selection from groups 1-4 is a direct substituent (once or more) on one of groups 11-18.

Group 11.

Group 12.

Art Unit: 1709

Group 13.

Group 14.

Group 15.

Group 16.

Group 17.

Group 18.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1-36.

Art Unit: 1709

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

3. The common technical feature of this application is an electroluminescent element comprising a pair of electrodes with at least one constituting layer containing a phosphorescent light emitting layer, wherein one of the layers contains a compounds of the following generic chemical formula, where Z_1 and Z_2 are aromatic heterocycles, and Z_3 is a divalent linking group:

The element claimed is not unique since similar devices have been disclosed by Ueda et al. (JP 2001-160488). Ueda et al. describe electroluminescent elements wherein a layer between the two electrodes is comprised of a compound of the following general formula:

Ueda et al. disclose specific examples such as, which meet the limitations of Applicants' claim:
